

Team member introductions

The Factoid Authority (TFA) is made up of the 5 members in the table below, we believe the complementary expertise of each member will be an important contributor to our company's success.

Member	Discord Alaias	Role
Stuart Johnson	@Stuart	System Administrator Software Development
Dennis Bunfield	@bunfield	System Administrator Software Development
Steven Masley	@StevenM	System Administrator Software Development
Tor Hogne Paulsen	@quintilian	Management & Documentation
Benjamin Dufty	@KiwiWithLazerEyes	Financial Management

Together, we can provide round-the-clock support, with a mixture of full and part-time roles across all time zones. Currently two of our members are full-time and another is transitioning away from their current work commitments to focus on **TFA** and Factom related projects. Eventually everyone will transition into full-time roles with **The Factoid Authority**.

Stuart Johnson

Location: United Kingdom

Occupation: Owner of Logic Ethos Ltd.

Background:

An electronics and software developer for 35 years.

Worked in the UK's Vehicle Breakdown Recovery Industry since 1990, building software, networking, hardware, and GPS Tracking solutions.

Started Logic Ethos Ltd in 2009, to replace the radio data network he help set up in the 90's.

Switched it all over to IP. We operate hardware in 4 UK datacenters. Connect to hundreds of sites, and thousands of vehicles/smartphones across the UK, and S. Africa.

Interest in crypto since 2011. Hired to help develop Bitcoin mining equipment in Shenzhen, China, 2014. Invested in Factom 2016.

Dennis Bunfield

Location: United States

Occupation: Real-time Simulation Developer

Background:

Over 25 years of professional software development for high performance real-time hardware-in-the-loop simulations.

Currently managing a team of 11 physicists and software engineers.
Developed support for FCT on Ledger hardware wallet.

Founded Cybitron, LLC in 2015 shortly after Factom ICO for exploring blockchain solutions centered around the Factom protocol as it gained maturity.

Steven Masley

Location: United States

Occupation: Software developer & Student

Note: Currently a contractor with Factom Inc., but this relationship will be ending in May this year.

Background:

Core developer at Factom since May 2016.

Experience developing applications on top of the Factom blockchain.

BS Computer Science 2014-2019 (Rochester Institute of technology).
MyFactomWallet project manager and core developer.

Tor Hogne Paulsen

Location: Norway

Occupation: Air Traffic Controller / Document Controller

Background:

More than 10 years of Air Traffic Control experience.

Responsible for negotiating the ATC-unit's Letter of Agreements with all adjacent control centers, as well as developing internal procedures and framework.

Extensive experience with handling documents subject to government regulations, as well as interacting with oversight regulators.

Previously editor of the ATC National unions quarterly paper, and on the board of the National Air Traffic Controllers union.

Proposed the Factom Community Testnet on Reddit in December 2017 and acted as interim Community Testnet Administrator until being elected a Factom guide on April 7th this year.

Benjamin Dufty

Location: New Zealand

Occupation: Commercial Analyst

Background:

Recently transitioned away from working for New Zealand's largest FMCG retailer.

Responsible for forecasting and budgeting annual sales ~\$500M.

Responsible for establishing & reporting on company's financial standing, as well as devising strategies to improve health.

Extensive experience in profitability modeling, pricing strategies and calculating campaign ROIs.

Experienced in capital management and accounting practices
