Responsibilities

- Work closely with the CEO on high level strategy for RewardChain
- Leverage brand and networks to ensure RewardChain is a sustainable company committed to Factom
- Develop the sales strategy for growing the company
- Develop high-level strategy and a scalable business model
- Provide financial business model development support

Co-Founder, CTO & Senior Systems Architect

Schalk Bower

Discord - schalk

<https://www.linkedin.com/in/schalk-bower-69562296/>

Location

Australia

Background

- Was contributing to BTC and running a full node in 2011
- Expertise in Node, C#, Angular 2+, Typescript and Microservices
- Has worked as a senior software developer for Cisco Systems for the last two years
- 12 years programming experience, 6 years commercial software development experience

Responsibilities

- Ensure RewardChain is always in a position to respond within an hour (with an aim of within 5 minutes) to any server issues
- Developing and maintaining the procedures internally to handle response time long-term
- Ensure exceptional performance and stability of the Auth Node(s) run by RewardChain
- Ensure seamless scaling of the Auth Node(s) RewardChain runs as the Factom Protocol grows
- Ensure high availability and continual communication in relevant Auth Node channels (Discord etc.)
- Add value to the Protocol by leading technical initiatives by RewardChain, including the development of applications that utilise and extend the utility of the Protocol
