

2018 Development Roadmap

Introduction

This document describes DBGrow's provisional 2018 development roadmap. This plan is subject to change, and is dependent on the interest of the Factom community. Q3 and Q4 are non-exhaustive projections, and will be further developed as our development priorities continue to come into focus.

1. 1st Month of Operation

- Overhaul dbgrow.com to reflect our projects with Factom
- Alpha release - Support System Application (Currently Pre-Alpha)
- Expand our Factom [Quickstart AML's and guide](#) to Azure for the Testnet (Currently only AWS)
- Begin publishing point in time snapshots of the Testnet and Mainnet blockchain for disaster recovery and bootstrapping purposes
- Develop comprehensive financial and compliance plans for Factom operations with legal and financial counsel
- Finalize a an ongoing working relationship with our set of advisors and counsel

2. 2nd Month of Operation

- Alpha Release - FactomDapps ([Pre-Alpha Github](#))
- Alpha Release - FactomObjectDB ([Pre-Alpha Github](#))
- Beta Release - Support System Application
- POC Release - Factom-HPLC/MS interface
- Expand AML and quickstart guide to DigitalOcean for the testnet
- Pursue new avenues to promote Factom online and at Silicon Valley events

3. Quarter 3

- Full Release - Support System Application
- Alpha Release - Factom MongoDB ([Pre-Alpha Github](#))
- Begin developer relations campaign
- Assess the priority and interest of our released projects

4. Quarter 4

- Continue development of most promising projects towards production ready releases
- Further exploration of Factom in scientific applications
